### DETAILED ACTION

1. This action is responsive to communications: Response, filed on 11/13/2006.

This action is non-final.

2. Claims 1-34 are pending in this application. Claims 1 and 17 are independent claims.
3. The present title of the invention is "User defined warping tool" as filed originally.

### ***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-34 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The practical application test requires that a "useful, concrete, and tangible result" be accomplished. See *AT&T Corp. v. Excel Communications, Inc.*, 172 F.3d 1352, 1359-60, 50 USPQ2d 1447, 1452-53 (Fed. Cir. 1999); *State Street Bank & Trust Co. v. Signature Financial Group Inc.*, 149 F.3d 1368, 1373, 47 USPQ2d 1596, 1600 (Fed. Cir. 1998). An "abstract idea" when practically applied is eligible for a patent. The Court in *State Street*, 149 F.3d at 1374, 47 USPQ2d at 1601 noted that "a process, machine, manufacture, or composition of matter employing a law of nature, natural phenomenon, or abstract idea is patentable subject matter even though a law of nature, natural phenomenon, or abstract idea would not, by itself, be entitled to such protection."

Art Unit: 2628

6. Claim 1 limitation claims "a computer implemented method" described as a computer program which is not a process, therefore is nonstatutory functional descriptive material.

7. Claims 1 and 17 claim computer program steps which fail the "useful, concrete, and tangible result" test, therefore are nonstatutory under 35 U.S.C. 101.

***Claim Rejections - 35 USC § 112***

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

9. Claims 17-32 and 34 are rejected under 35 U.S.C. 112, first paragraph; as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

10. As per claim 17, preamble claims "a computer program product tangibly embodied in a computer readable medium". It is not clear how a product can be tangibly embodied in a computer readable medium.

***Response to Arguments***

11. Applicant's arguments, see Amendment, filed 11/13/2006, with respect to the rejection(s) of claim(s) 1-34 under Milliron in view of Jennings have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of non-statutory subject matter.
